I will talk to Ken to resolve this. AECOM should have something out to us today on their data and on a regular basis here on. We will see.

Thanks,

Davis Zhen, Manager

If they can't get us the data, QA'd on a weekly if not daily schedule Davis, I *suggest* we shut down work until they can figure that out. (with a warning per Chris' specifications from yesterday when I went over this on the boat tour). So an email/call today, shutdown Monday.

"EPA expects the preRD group to provide weekly data on surface sediment grab recovery levels and locations. If these are not provided for the week of 4/23/18 by Monday 4/30, work will be shut down until rectified."

S

Sean and Davis,

Here is a follow up on a possible issue that Jason noted in the yesterday's daily report. When he attempted to take a

photograph of the sign in sheet from the tailgate health and safety meeting, the AECOM rep told him that the could not allow CDM Smith to photograph any of their field data sheets including that sign in sheet. We don't normally photograph their field data sheets and I do understand AECOM's concern of sharing their crews field data before senior staff QC it. Given the slow process of getting information from the PreRD Group (e.g. still have not received a complete list of sample grabs, penetrations, coordinates) this could come up as an issue to EPA if we are not allowed to get real time copies of field data or maps.

Subject: Daily Report 4/25/2018 Portland Harbor PreRD investigation

Sean and Davis,

Here is the daily report for Wednesday on the oversight of the fish acoustics study receiver deployment on Wednesday. No surface sediment was conducted.

On Thursday Jason Silvertooth will continue oversight of the receiver testing and Julee Trump and Andy Greazel will provide oversight on the two sediment sampling vessels.
